SMART TECHNOLOGY

Thanks to the «smart» automated system you can now cooking becomes not only easy and delicious but absolutely safe and it guarantees splendid tasteful results every single time with little or no user intervention.

We didn't name the technology as SMART with no reason as it is «intelligent, clever, resourceful, and insightful». All these epithets can be attributed to our devices. It is the «smart» automation that takes over all the functions of the preparation, monitors the progress of the process and ensures maximum safety for the user, and you need only select the desired program. The unique multi-level security system that monitors a set of electronic systems and functions to ensure maximum reliability of the use of any of our devices will take care of your safety. Among them, first of all, it is worth noting the high pressure multicooker MP5015PSD, equipped with 13 levels of security and

almost unlimited possibilities in the preparation of many dishes. In the MD2560G and MD2360G microwaves the SMART technology is realized through the RUSSIAN COUSINE function – a set of optimized programs for the preparation of the most popular dishes. The IG1200B model is unique for the Russian market, because it has all the advantages of an induction cooker and an electric grill, combined in a single instrument. The BM1000JY breadbaker this technology is presented in the program RUSSIAN BAKER, specially designed to easily bring to life the most popular recipes of bakery products.

EASILY

TASTILY

SAFELY

High pressure multi cooker

Made in Korea

MP5015PSD

«Multi» in the word multicooker means multiplicity, the recurrence, that is a union of several components. This device has really absorbed the «duties» of a pressure cooker, a porridge cooker and the making of bread. In a word – multicuisine!

The Oursson MP5015PSD multicooker – it is not only a great helper of the housewife in the kitchen that can fry, steam, boil, braise, bake, but also a convenient alternative to the set of old kitchen items.

After all, it is incredibly convenient when there is no need to wash a huge mountain of dishes to cook, for example, the

first dish. Now you can do it all in one pan, preparing all the necessary products directly in it.

Your new assistant has 45 automatic control programs, 13 levels of protection and a ceramic non-stick coating that is easy to clean and is super durable, also includes a recipe book, and accessories for the ease of combining ingredients.
