JM7002

bon appétit

FULL
PALETTE
OF FLAVORS

Auger juice maker JM7002 OURSSON with a wide feeding chute (for a whole apple) allows loading whole fruits without pre-grinding. Thanks to slow squeezing and a powerful auger (screw), you will get maximum amount of juice with a large amount of nutrients and vitamin C from any kinds of vegetables, fruits, herbs and berries. Unlike conventional centrifugal juice makers, this device works much quieter. Convenient spout with a lid will keep working surface clean, without a single drop of juice.

Color	EAN-code	Main Features

Suitable for all kinds of berries	Yes
Suitable for all types of fruits	Yes
Suitable for all types of vegetables	Yes
Rated voltage	220-240 V~; 50-60 Hz
Class of protection against electrical shock	I
Power consumption, W	240

COLD PRESS Technology

UNIVERSAL

You can obtain juice almost from any product

The unique technology allows to get juice by squeezing not only from soft and juicy fruits and vegetables, but also from the hard vegetables with high fiber content as well as fruits and berries with seeds. You can even get juice from greens and sprouted wheat.

MORE JUICE

More juice from every product

Durable auger shaft is used for the extraction. It presses and squeezes the juice from fruits and vegetables. The result is a more output of juice and a dried cake. This is done by crushing and grinding the pulp carefully by auger through a three-mesh filter with small holes.

MORE VITAMINS

«Alive», natural, bright and delicious juice, charged with vitamins

Cold press is the best way to get natural juices, which kept all the nutritional value (save up to 68% of vitamins), natural flavor and natural taste of fruits and vegetables. Extraction process will be fast and pleasant, and juices will have natural flavor and color and it will be truly valuable for health.
